The pulse oxygen saturation is the percentage of HbO₂ in the total Hb in the blood, so called the OZ concentration in the blood. It is an important bic-parameter for the respiration. For the purpose of measuring the SpO₂ more and accurately, our company developed the Pulse Oximeter. At the same time, the device can measure the pulse rate simultaneously. The Pulse Oximeter features in small volume, low power consumption, convenient operation and being portable. It is only necessary for testes to put one of his fingers into a fingertip photoelectric sensor for diagnosis, and a display screen will directly show measured value of Hemoglobin Saturation.</p>
